## Training

Multimodal training by Geo4i's trainers requires the transformation of your business objectives or strategic, in a developed training system that aims to:

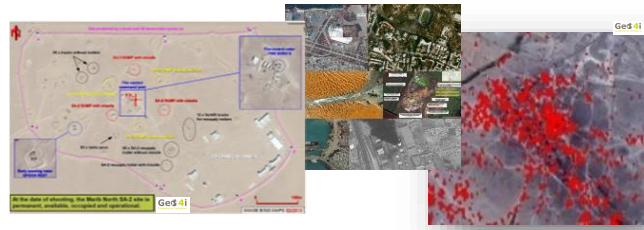

- ✓ You understand and allow learning taking into account your specific requirements (first step for understanding of the need)
- ✓ You teach courses and updated methods
- ✓ You allow climbing skills
- ✓ Respect your limitations, your goals and cultural specificities

## Our contributions

- ✓ Educational materials that present the key concepts and fundamental techniques
- ✓ Tools dedicated to applications (*Help-i, Rgen-i*)
- ✓ Exercices, scenarios
- ✓ Evaluations on request

## Applications

- CIVIL & MILITARY**
- Imagery and image analysis: account imagery jack (optical, infrared, radar) and operations
  - Geospatial Analysis: The geographic location information, management and recovery of data, visualization of information
  - The identification of sites, equipment
  - ...

Through support missions in organizational development, policy and structural, Geo4i is able to accompany you throughout the learning phase.
