# Our tool : Help4i

**Help for identification**

With expertise in imaging , Geo4i offers an indispensable aid in the identification of materials

## Help4i

It allows an analyst to **identify material and equipment** based on criteria such as length, width, country, ...

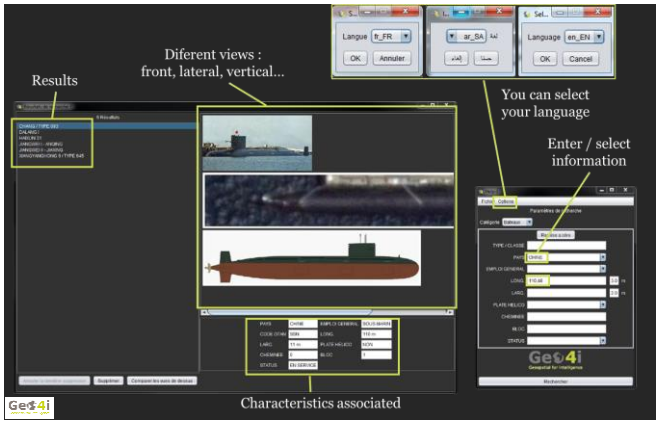
The database contains :

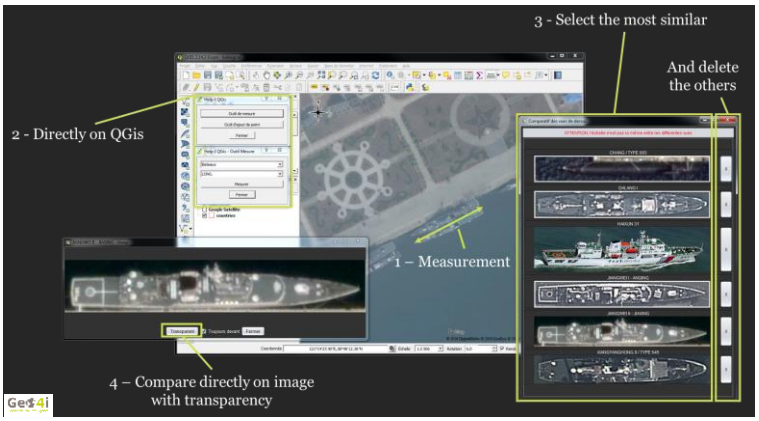
- ✓ **Naval** about 3000
- ✓ **Air** about 1 100
- ✓ **Land** about 600
- ✓ **Surface to Air** about 50

**Vertical views** of material and equipment from Help4i database make it easy comparison.
Setting **transparency** and overlay directly on the image contributes significantly to the identification.

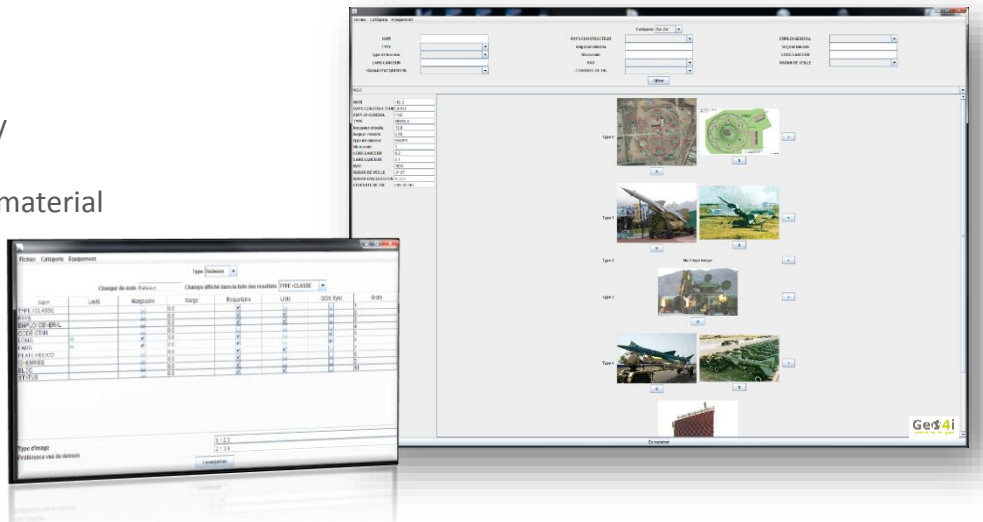
**Blueprint** associated at material and equipment make Help-I an excellent **educational** tool !

## User





## Admin

To administer the database :


- ➢ Add a new material category
- ➢ Add a material
- ➢ Add or delete properties of material
- ➢ Manage photos
