

The system

- The aim of Help4i is to assist the analyst to identify materials **as easily and quickly as possible**, to realize Imint report.
- First of all, the system was developed for the **needs of Geo4i**, conforming the recommendations of its experts in Imint.
- The database contains several thousand of military and civilian materials, selected, updated and administrated by **IMINT analysts** who have more than 15 years' experience in military identification by imagery.
- Using the tool is **effective and intuitive**.
- It can be used **alone or connected** to Geographic Information Systems QGIS or ArcGIS (with plugin), and other systems on request.

Composition of Help4i system

Help4i software users

Plugin QGIS 2.XX / ArcGis 10.5

Help4i software administrator

Help4i / Train4i

Features
